→ Chapter 1 Introduction

vjoon Content Activator is a plug-in for Adobe® InDesign® that allows you to activate the content of any secured frames contained in a layout. Whenever Adobe InDesign files are extracted from any kind of workflow system, e. g. exporting them from vjoon K4®, the frames are secured and cannot be edited. In case, you want external employees or service providers to edit these exported layouts, they can use this plug-in to activate any content for editing.

You can download vjoon Content Activator free of costs from the vjoon website. vjoon K4 customers receive it with their vjoon K4 software.

System Requirements

vjoon Content Activator can be used with Adobe InDesign and has the same system requirements that apply to the following software versions:

- vjoon Content Activator 1.8.x for Adobe InDesign CC 2014
- vjoon Content Activator 1.9.x for Adobe InDesign CC 2015
- vjoon Content Activator 1.10.x for Adobe InDesign CC 2017
- vjoon Content Activator 1.11.x for Adobe InDesign CC 2018
- vjoon Content Activator 1.12.x for Adobe InDesign CC 2019

Installation

(1) Copy the vjoon Content Activator plug-in into the folder "Applications/Programme (may differ according to the language of the operating system you are using) > Adobe InDesign > Plug-ins" on your computer.

(i) It is not possible to use vjoon Content Activator together with vjoon K4 plug-ins on the same computer. In this case, vjoon Content Activator is disabled.

(2) Launch Adobe InDesign. If it is already running, quit the application and restart it.

You can now start to work with vjoon Content Activator as described in the next chapter.

About this manual

This manual assumes that you are familiar with OS X and the different Windows operating systems as well as Adobe InDesign. If this is not the case, please refer to the corresponding documentation.

→ Chapter 2 Using vjoon Content Activator

vjoon Content Activator allows you to activate content in layouts that have been exported from any workflow system. By default, any content in frames is secured and cannot be edited. Using this plug-in, you can change this setting simply by opening the exported layout with your Adobe InDesign application and applying the Content Activator command to the layout.

Please keep in mind, that it is not possible to use K4 plug-ins and vjoon Content Activator on the same computer. In this case, vjoon Content Activator is disabled. This plug-in is available in English language, only.

(1)

Open any layout file that has been exported from a vjoon K4 system using Adobe InDesign.

(2)

Select the command "Layout > Activate Content".

All frames within the layout are now unsecured, and you can start editing their content.

→ For further information on how to export layouts, objects or entire issues from a vjoon K4 system, please refer to the corresponding vjoon K4 documentation.
